

**Information of COVER TECHNOLOGIES Sp. z o.o.**  
**on the workshop: BALASTBONDING**

Dear Ladies and Gentelmen! Conference participants!

We are pleased to inform you that during this year's conference, we are inviting you to participate in the workshop during which you will be able to gain practical knowledge on the innovative technology of balastbonding.

The workshops, that have never been conducted at any conference in Poland, will take place on December 4, for two groups. The number of participants is limited.

During the workshop you will find out what it is and what are the benefits of balast gluing. You will see how polyurethane resin is applied to the crushed stone and what equipment is used for it. In hotel conditions, we will try to recreate the realities of the tracks so that you can gain not only just theoretical knowledge, but practical skills as well. We will glue the crushed stone together and the results of our work will be available to all conference participants 24 hours later, on December 5. Santa Claus will bring a surprise to the most active participants on December 6.

Participation in the workshops does not require additional fees.

The workshops will be conducted by qualified employees of Cover Technologies Sp. z o.o.

If you would like to prepare for a workshop, we invite you to visit [www.stabiltrak.pl](http://www.stabiltrak.pl).

The number of places is limited to 60 participants – we will take into account the order of notifications. If you are interested in participating in the workshop, please send an email to [anna.karpierz@sitkrp.org.pl](mailto:anna.karpierz@sitkrp.org.pl) by November 26, 2019.

In the e-mail please provide: name, surname, company, position and contact telephone number.

We will inform you in detail about the workshop time by e-mail.
